

**E9.30 Xtone Stuc Ice, E7.90 Roble Alba**

Our E9.30 Xtone Stuc Ice, E7.90 Roble Alba is a clear example, with its stunning design and ability to meet all a great cook's needs.

This Emotions kitchen stands out for its finishes. It combines Xstone Stuc Ice, a high-performance compact mineral material able to meet the most discerning of needs, with a Roble Alba wood veneer finish: two materials that fit in to perfection with the central island's Carraca marble countertop.

The central island draws all eyes, thanks to its elevated design on a Wabi-sabi base structure made up of two feet in a Cien Sable finish. This lends it a certain

industrial air in keeping with the backlit open shelves in a negro mate finish, whose contents can be used to decorative effect.

The kitchen's tower units, made of Xtone Stuc, afford high storage capacity, in addition to housing some of its electrical appliances.
