walk-in-closet range specifications

why working with **GAMADECOR**

Production CAPACITY.

GAMADECOR's furniture manufacturing facilities cover an area of 135,000 m2, with a work system conceived to adapt the work load to its production capacity.

Cutting-edge TECHNOLOGY and DESIGN.

GAMADECOR uses state-of-the-art machinery to manufacture its furniture. It also conducts ongoing studies of design trends, as demonstrated by the prestigious international design awards that it has received, such as Good Design, Red Dot or If design.

Made in EUROPE.

GAMADECOR's furniture is fully manufactured in Spain and the cabinet hardware for all its products is made by leading European brands. All the board that it uses are sourced from controlled forests. This guarantees that it is harvested from responsibly managed forests in accordance with sustainable tree-felling criteria.

AFTER-SALES service.

GAMADECOR is committed to offering quality and first-class service to customers. To meet this goal, it offers a speedy, efficient after-sales service through all official distributors of PORCELANOSA GRUPO in the almost 100 countries in which it operates.

The BRAND.

The assurance of PORCELANOSA Grupo, a major business group that has forged a leading reputation both in Spain and abroad, supplying products to more discerning market segments.

ALL-ROUND consultancy advice.

PORCELANOSA Grupo is present in almost 100 countries worldwide, offering an all-round design, onsite supervision and assembly service, with total dedication to the task thanks to its extensive team of staff.

A choice of PRODUCT RANGES.

GAMADECOR offers a choice of two different wardrobe collections and their corresponding models to meet differing wardrobe design requirements. In addition to its wardrobe furniture, GAMADECOR also manufactures a wide range of bathroom and living furniture and kitchens.

Assured QUALITY.

Each of PORCELANOSA Grupo's different companies offer the assurance of superior quality, endorsed by nearly 50 years' experience manufacturing top-quality products able to pass the strictest resistance and stress tests.

ECOLOGICAL commitment.

Sustainability – that is achieving a balance between human development and the conservation of natural resources – is a key priority for GAMADECOR. It is one of the main driving forces behind initiatives like the implementation of different environmental management systems over the years, ongoing improvements to the efficiency of the company's production systems, and the progressive elimination of plastic from its packaging. This has led to a dramatic reduction in the environmental impact that GAMADECOR makes, and the company aims to continue reducing it through ongoing improvements in the field of sustainability.

On the one hand, an Environmental Management System has been set in place, based on the international ISO 14001 standard. Thanks to this system, environmental aspects of all GAMADECOR's activities and their associated impacts can be more easily identified and improved on, in addition to fostering environmental protection and the prevention of pollution.

On the other, GAMADECOR is an FSC® certified company, hence ensuring that mostly of its raw materials used in the company's furniture comes from certified and/or properly managed forests.

Carbon footprint analyses are another important initiative in the field of environmental management. They consist of measuring all the company's direct and indirect greenhouse gas emissions from all walks of its activities so that specific measures can be introduced to reduce and/or offset the impact of greenhouse gas emissions.

More ENVIRONMENTALLY FRIENDLY raw materials.

The particleboard in GAMADECOR's cabinets is made of 72% recycled content, with the circular economy accounting for 49% and sawmill residues (by-products) for 23% of this figure.

This 49% from the circular economy is made up of furniture, doors and other wood remains that are taken to recycling centres.

By using recycled material, GAMADECOR avoids the felling of over 14.334 trees a year, which are capable of absorbing 4.796 tons of CO2, equivalent to over 2.940 flights between Madrid and New York.

All GAMADECOR's furniture contributes to the circular economy, because the materials can be re-used to make new furniture.

When the board is cut and processed, 86,000 kg of extremely clean sawdust is generated. This is used as BIOMASS (renewable energy). All the remnant pieces of chipboard (1,400 tons) are ground up again and mainly re-used in the manufacture of new board.

 **72% RECYCLED MATERIAL**

=

 **14.334 SAVED TREES**

=

CO₂ 4.796 TN ABSORBED BY TREES

=

 **2.940 FLIGHTS: MADRID → NEW YORK**

NOTE: These figures were calculated using Gamadecor's production statistics for 2019.

Presentation of *emotions*® walk-in-closets.

Walk-in-closets *emotions*®: modularity, design, and elegance.

Straight lines and the large capacity of the different storage sectors define the concept of this industrially inspired dressing room in which functionality plays an important role.

Doors and vertical panels have been removed, thereby giving a powerful sensation of visual lightness, transforming this Gamadecor wardrobe into an elegant piece of furniture. Simplifying the decoration makes the dressing rooms collection look in order and organized.

Profiles in an exclusive finish, with the option of **INTEGRATED LED LIGHTS**.

Cien Sable profiles. This is the frame used in Emotions wardrobes and walk-in closets, made of aluminium in a Cien Sable finish. In combination with the other finishes available in the Emotions collection, it lends rooms an elegant, minimalist appeal. This kind of frame is modular, allowing users to plan the whole design with total freedom to suit their needs. Sophisticated linear LED lighting can also be incorporated vertically in the profiles to illuminate the interiors in practical, attractive style.

INVISIBLE HINGES for a more distinguished design.

GAMADECOR walk-in closets are fitted with slimmer elegant hinges, embedded in the wood board and profiles so that they are completely invisible when the closet is closed. Thanks to the doors' soft-close system, they are protected from violent impacts.

Sophisticated **CONCEALED SHELF SUPPORTS**.

A concealed system of shelf supports holds the shelves in place. Because the supports are embedded in the underside of the shelves, the final appearance is clean, elegant and lightweight. They are also designed to withstand heavy loads so that, in combination with the thicker shelves, the whole ensemble is highly resistant.

Drawer units with a **SILENT SOFT-CLOSE SYSTEM**.

The drawers, deep drawers and shoe racks are made of wood board in a Nadir finish which matches the Cien Sable finish of the profiles, giving GAMADECOR's collections an exclusive, harmonious appeal. The drawer runners pull out completely and they are fitted with a soft-close mechanism to protect the whole ensemble from impacts when the drawers are closed, prolonging its useful life. The drawers can also withstand heavy weights and they easily pass the most rigorous tests, surpassing the standard's required 60,000 opening cycles.

CARB-2 / EPA rated board with ultra low emission of formaldehyde.

The panels used in carcasses are even more health-conscious thanks to the lowest formaldehyde emission certified in the CARB II (ATCM 93120) / EPA (US EPA TSCA Title VI) in Formaldehyde emission.

In conjunction, the laminate, lacquer, and wood veneer finishes in the emotions® collection all offer an extensive choice of colours.

SMOOTH LAMINATE finishes, with elegant finer details.

-e1 smooth laminate:

Fronts faced with monochrome melamine paper, made of uniform-coloured laminated melamine resin. This ensures a discrete seam around the edges, with no black line. Because the doors are laser edged with polypropylene edgebanding, a more watertight, longer-lasting, almost invisible seam is achieved. The interiors of the units come in the same choice of finishes.

CUTTING-EDGE LACQUER finishes in a wide spectrum of warm or cool colours.

-e4 matt and e5 gloss lacquer:

GAMADECOR's lacquer finishes are applied using state-of-the-art machinery and strict controls of different variables so as to ensure a broad colour spectrum.

The edges are slightly rounded to boost their impact resistance and ensure a more perfect seam.

Thanks to the chemical composition of the paints, the matt lacquers have a diamond hard effect so as to avoid surface scratches, while the glossy lacquers are given an additional polish to achieve their 100 GLOSS mirror-like shine.

WOOD VENEER finishes with a unique personality.

-e6 smooth veneer:

The emotions® wood finishes are made of wood strip veneers, specially chosen for their highly attractive, distinctive wood grain pattern.

-e7 rustic-look veneer:

These finishes are similar to the above, with the addition of one extra process in which any weaker surface wood is removed to highlight the wood grain texture of the hard wood. This leads to an elegant rustic vintage look.

GLASS for added personality.

Glass provides privacy when needed, with panes of different degrees of translucence. The coloured panes interact with the light, creating contrasts and contributing to more interesting settings. This is why GAMADECOR offers a choice of different glass finishes for added personality.

ELEGANT DRAWER and DOOR PULLS in an exclusive finish.

The glass doors feature an elegant aluminium door pull, fully integrated in the design of the walk-in closet. It comes in a Sable finish, an exclusive finish for GAMADECOR's aluminium profiles.

In the case of the drawers, the swing handle is embedded in the drawer front, visible as a subtle, elegant line.
